

# For Clean Sightlines

use the

**STEALTH-RAIL**

Patent Pending

*A Non-Penetrating Collapsible Guardrail System*

The StealthRail is a self-contained collapsible rail section for the SafetyRail 2000 Guardrail System. Its one-way pivot assembly allows the rails to fold on to a surface and then not exceed a vertical plane when in the upright position. A detent pin is attached to each pivot assembly that locks the rails in the upright position. SafetyRail 2000 requires no penetrations in substrates for installation. The system exceeds OSHA (Standards - 29 CFR) 1926.501 and 1926.502.

When the system is in its folded position, there are clean sightlines from ground level and the building's architectural integrity is preserved. If you are concerned with aesthetics, the StealthRail is your solution!!

*Perimeter protection*

- Save \$\$\$\$ over an engineered lifeline system.
- Rails come in 3', 3-1/2', 4', 5', 7-1/2' and 10'.
- A tough UV yellow powder coat finish comes standard. Other colors and galvanized finishes are available.
- The rails can be mounted in infinite positions.
- Use the system around mechanicals or for perimeter protection.
- Certified test results are available.

## FALL PROTECTION CHECKLIST

	Y	N
<i>Protect assets - employees/roof</i>	<input type="checkbox"/>	<input type="checkbox"/>
<i>Reduce engineering expense/lifelines</i>	<input type="checkbox"/>	<input type="checkbox"/>
<i>Preserve architectural integrity</i>	<input type="checkbox"/>	<input type="checkbox"/>
<i>Out of view when not in use</i>	<input type="checkbox"/>	<input type="checkbox"/>

If you answered yes to any of these questions, BlueWater's new **StealthRail** is your fall protection solution! It's the newest component in the SafetyRail 2000 Guardrail System Product Line and it exceeds OSHA Fall Protection Regulations.
